Professional Summary

Experienced Backend Python Developer specializing in Python, FastAPI, PostgreSQL, REST APIs, SQLAlchemy, JWT Authentication, and scalable backend systems. Built AI-powered resume screening and job matching systems using NLP and vector embeddings. Strong experience in backend API development, database optimization, authentication systems, semantic search, and production-ready FastAPI applications.

Core Skills

Programming Language	Python
Framework	FastAPI
Database	PostgreSQL
ORM	SQLAlchemy
Authentication	JWT Authentication
Backend	REST API Development
AI/NLP	NLP, Embeddings, Semantic Matching
Other	Docker, Git, Uvicorn

Professional Experience

Senior Backend Python Developer | TechNova Solutions | 2021 - Present

- Developed scalable backend APIs using Python and FastAPI.
- Designed PostgreSQL database schemas and optimized SQL queries.
- Built AI-based resume screening and job matching systems using NLP.
- Implemented semantic similarity matching using vector embeddings.
- Created recruiter authentication systems using JWT tokens.
- Worked extensively with REST APIs, SQLAlchemy ORM, and Uvicorn.
- Integrated machine learning models into FastAPI backend services.

Education

Bachelor of Engineering in Computer Science
Visvesvaraya Technological University
